6.1 Industrial Auctions and the person on whose behalf the lot will be auctioned strive to achieve the greatest possible accuracy and clarity of the description of a lot on the website, auction catalogs, other auction brochures, advertisements and such, without any liability for damages arising from incorrect or incomplete descriptions or other damage.

6.2 Pipes, cables and/or other connections for energy, control or production that are located on/in a lot are to be, unless expressly stated in the Specific Online Auction Terms and Conditions stated, only sold to the first valve, fitting or applied mark. Article 7. Adjustments; operation

7.1 If and insofar as any clause of these General Terms and Conditions is invalid or unenforceable, the remaining clauses of these General Terms and Conditions will remain valid. Industrial Auctions will then adopt a new clause to replace the invalid/annulled clause, as far as possible the scope of the invalid/annulled clause shall be respected.

7.2 Industrial Auctions can, in addition to these General Terms and Conditions, declare the Specific Online Auction Terms and Conditions applicable. They are therefore already accepted by the user. In case of contradiction prevails the clause of the Specific Online Auction Terms and Conditions over the clause in these General Terms and Conditions.

7.3 The present General Terms and Conditions may be deviated only when this is stipulated in writing by an authorized representative of Industrial Auctions.

9.2 If a lot is accompanied by one or several other lots as a combination in auction this shall be indicated on the page of the individual lot. In that case, there can be placed bids first on the individual lots of the combination and after the closing of all individual lots, offered on the combined lot. Individual lots can be allocated only if the total amount of the highest sustainable bids on the individual lots is higher than the highest sustainable bid on the combination. The combination will be allocated solely if the highest sustainable bid on the combination is higher than the total amount of the highest sustainable bids on the individual lots.

9.3 Bids can be placed in the form of a "static bid" or a "proxy bid". In a static bid, the user places a bid in the form of a fixed amount per lot. In a proxy bid the user indicates the maximum price he is willing to pay for the lot. The auction system then ensures that, after outbidding by a third party, in the name of the user, the minimally possible higher bid is introduced, as long as the maximum indicated by the user has not been reached. A proxy bid can only be disabled by the user by placing a static bid that at that moment is the highest bid.

If the user does not get an e-mail within the period mentioned above, this means that his bid has not been allocated. Industrial Auctions reserves the right not to allocate or to allocate under suspensive condition(s).

9.6 The risk of the lot(s) is transferred from the seller to the buyer at the moment of allocation. The seller is up to the allocation obliged to properly insure the goods and maintain properly insured against fire, explosion and water damage and theft. Seller is also obliged to take out adequate insurance and liability insurance and maintain so. The policies and the proof of premium payment of these insurances (or at least copies of them) must be provided by seller on first request to Industrial Auctions.

9.7 Industrial Auctions is not a party to the purchase agreement but merely mediates in the creation of purchase agreements between buyer and seller. Its content is always precisely defined. Seller and buyer realize there on the part of Industrial Auctions may involve a conflict of interest. Buyer and seller hereby give permission to Industrial Auctions for simultaneously serving (the interests of) the buyer and seller.
